General cleaning instructions

For all surfaces, clean often and gentle.
Remove stains right away. Always try
the mildest cleanser first.

Further instructions regarding each
specific article can be found in the
following pages or at:

Laminate and treated wood

In most cases, you only need to use a
clean, damp, nonabrasive cotton cloth and
a mild liquid detergent.

Wipe the surface dry with a soft, clean,
non-abrasive cotton cloth .

Do not use abrasive cleaners, steel wool,
sandpaper, or Scotch-Brite® scouring pads,
this will cause scratches.

Do not use cleaners containing acid, alkali
or sodium hypochlorite. These cleaners will
etch, corrode and permanently discolor
laminate and wood surfaces.

Glass

If residual streaks and smears remain after
normal cleaning, use a mild glass cleaner
and then dry with a clean, nonabrasive
cotton cloth. Avoid window cleaners.

Carpets

When new, hand tufted carpets such as the
luxurious lounge carpets, can loose some
excess yarn. This is not a sign of poor
quality and should stop after 2 weeks of
daily vacuuming.

SENAB

Wool cleaner

Cleaner and conditioner for wool fabrics, sheepskins and most hair clad skins and hides. Contains no enzymes, bleach or phosphates.

Wool fabric

Vacuum the fabric carefully. Pump out a foam onto a polyether sponge and clean with light circular movements. On stains, work in circles from the outside towards the center. Leave outer circle damp to avoid ring marks. Let dry completely and vacuum off any dry leftover particles.

Please note! Always pre-test on a hidden area. Keep out of reach of children.

Composite cleaner

Use on all white Corian furniture such as Reception Counter and Consultation Desk. For daily cleaning it is sufficient to wipe the surface with a micro cloth dampened with water.

Deep Cleaning

Place a thin layer of Composite Cleaner on the surface with the white micro cloth. Use the white side of the regular sponge and wipe with circular movements.

Stain Remover

Dampen the white sponge with water and use to remove stains and spots from the surface.

Sealing

Apply the Composite Sealer in an even and thin layer over the surface with the blue cloth and allow to dry. Dampen a cloth with water and polish the surface.

SENAB

Universal cleaner

Highly effective cleaner for use on steel surfaces and non sensitive hard materials.

Directions

Press and turn the paste using the included sponge. Moisten the sponge with water and squeeze until foam appears. Clean and polish the designated surface until clean. Wipe dry with a clean soft cloth.

Please note! Always test the product on a small, hidden area of the surface before treatment.

Universal Cleaner does not contain any poisonous substances and is environmentally friendly and long-lasting.

Wax oil

Dry oil for use on wooden surfaces. Gives a durable finish on all, not varnished wood. Makes surface resistant to spillage, allowing extra time to blot up spills, and also makes stain removal easier.

Directions

Stains from wine or colored liquids should be rubbed off with a light grain sandpaper before application. Apply the wax oil evenly with a soft cloth. Rub in the wet oil with 400-paper or an abrasive sponge. Wipe off after 30 minutes. Repeat treatment if needed. Let dry over night before the surface is taken into use.

Please note! Burn or water-soak used cloths, because of the self ignition risk.

Stain remover

Effective cleaner suitable for most textiles and surfaces.

Directions

Always test on a hidden surface before use. Spray on the stain and dab with clean sponge. *Do not rub!* Clean with water after if needed. Dry by dabbing with dry sponge.

Glass and mirror cleaner

Glass & Mirror Cleaner is intended for all glass surfaces and mirrors.

Directions

Spray directly on to the surface and then wipe with a clean, lint-free cloth. Wipe one more time with a clean, dry cloth. Avoid application on sunlit surfaces. Do not heat and do not apply on a hot surface. Contains no ammonia.

Laminate & wood cleaner

Environmentally friendly product for easy removal of spills on oil treated, varnished, lacquered and laminated wooden surfaces.

Directions

For oiled wood, apply the liquid directly on to the surface and work in direction of the grain using a Scotch-Brite sponge until the dirt dissolves.

On lacquered, varnished, painted and laminated surfaces, use a soft sponge or cloth. Wipe residue with a clean cloth.

As the liquid absorbs the dirt, it is necessary to repeat treatment until the wooden surface becomes clean. When dry, leave for an hour before applying necessary oil treatment or furniture polish.

Dry schampoo for carpets

Directions

Vacuum-clean carpet thoroughly to remove any loose dirt. Sprinkle dry shampoo on a small area of the carpet. Rub it in with a clean dry brush. Leave for 20-50 minutes, depending on extent of stain. Use vacuum-cleaner to remove stain and loose particles. Stubborn stains and heavily soiled areas may require treatment to be repeated.

Leather cleaner & protection

Soft Cleaner for Leather is a gentle but effective cleaning liquid.

Directions

Apply to sponge and squeeze until foam appears. Clean area with light circular movements. Do not rub! Wipe dry with a clean cloth. Repeat for every or every second month for best result.

Leather Protection Cream+ is a water-based protector for all leather types. Provides a barrier on the surface of the leather, protecting it against water and oil based stains.

Directions

Clean with Soft Cleaner for Leather before treatment. Apply cream on the cloth and gently wipe with circular movements. Let dry. Polish with light pressure. Do not rub! It is recommended that new leather be treated prior to use with Leather Protection Cream+ and 2-4 times per year thereafter.

White pigmented oil

Guardian White Pigmented oil is intended for use on Wegner CH24 chair and provides effective protection against liquid stains, dirt and more.

Directions

Stains of coffee, red wine or colored liquids should be sanded off with fine sandpaper before applying. Apply evenly, in the same direction as the wood grain with a soft cloth or sponge. Work it into the wood with long even strokes. Let soak in for 10 minutes. Wipe all excess oil. Let dry for about two hours. Repeat after a few days if necessary.
